# CITATIONS

Appear in narrative parts of the document and hint at the list of references. This is why they are often called *in-text citations*.

Purpose:

- a) Support statements of the author
- b) Document sources of paraphrases and word-by-word quotations.

Citations are mentioned in two different ways:

## **Narratively (author-oriented citations):**

In the last few years, the successful publications of Day & Gastel (1979), Truss (2003) and Pears & Shields (2006) on scientific writing have been updated and issued in a new edition.

or

## **Parenthetically (content-oriented citations):**

In the last few years, several successful publications on scientific writing have been updated and issued in a new edition (Day & Gastel, 1979; Truss, 2003; Pears & Shields, 2006).

# (LIST OF) REFERENCES

Placed at the end of a document, the list is a comprehensive set of the full bibliographical references of all documents mentioned in the narrative. Individual entries are sequenced alphabetically according to the '*who–when–what–where*' principle.

Purpose:

- a) Acknowledge ideas borrowed from other sources.
- b) Help the reader find these sources, thus enabling them to read the original.

Day, R. A., & Gastel, B. (2024). *How to write and publish a scientific paper*. (9<sup>th</sup> ed.). Cambridge University Press. (First published 1979).

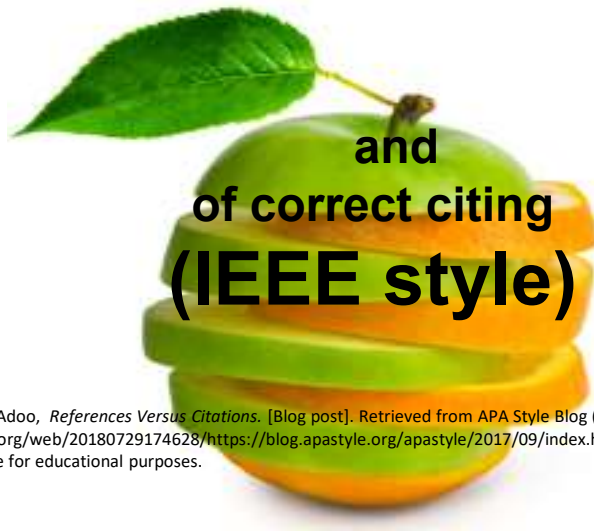

Pears, R., Shields, G. (2022). *Cite them right. The essential referencing guide*. (12<sup>th</sup> ed.). London: Bloomsbury Publishing. (First published 2006).

Truss, L. (2009) *Eats, Shoots and Leaves. The zero tolerance approach to punctuation*. (4<sup>th</sup> ed.). London: HarperCollins. (First published 2003).
