

There is no worklist. All user tasks use the default timeout endpoint.

The log server is running on port 12233(<https://lehre.bpm.in.tum.de/ports/12233/>) by me. If it is shut down, please run the file log.js in the folder public_html with command: `node log.js`

The log is stored in file log.yaml(<https://lehre.bpm.in.tum.de/~ga94hor/log.yaml>), which has pre-written header attributes.

LOG Visualization

Please visit <https://lehre.bpm.in.tum.de/~ga94hor/data.html>

The data is displayed as text showing the number of instances at different stages and the total revenue for all instances.

Number of instances in design: 1

Number of instances in build: 1

Number of finished instance: 4

Total revenue: 10500€
